

DEEPER INTO DIVING

Contents

Page

PREFACE

SECTION 1: Physical, sensory, physiological and psychological considerations

1.	Physical, sensory, physiological and psychological problems associated with depth.	13
2.	Physiology.	
	2.1 Respiration and circulation.	19
	2.2 Effect of scuba diving on respiration and circulation.	39
3.	Nitrogen uptake and elimination.	43
4.	Bubble formation.	49
5.	Decompression illness.	
	5.1 Cause, manifestations, management and after-effects.	61
	5.2 Prevention.	94
6.	Nitrogen Narcosis.	103
7.	Carbon dioxide and diving.	109
8.	Oxygen	117
9.	Heat loss.	133
10.	Dysbaric osteonecrosis.	151
11.	Women and diving.	157
12.	Drug use and the diver.	167

SECTION 2: Decompression systems

13.	History of decompression tables.	181
14.	U.S. Navy Tables.	
	14.1 History and design.	189
	14.2 Using the U.S. Navy Tables.	198
	14.3 Suitability of the U.S. Navy Tables for recreational diving	211
15.	More conservative alternatives based on the U.S. Navy Tables.	
	15.1 The Huggins Tables.	215
	15.2 The Bassett Tables.	218
	15.3 The NAUI Dive Tables.	219

	Page
16. Probabilistic Tables.	221
17. Bühlmann Tables.	225
18. DCIEM Tables.	241
19. The BS-AC Tables.	257
20. The DSAT / PADI Recreational Dive Planner.	283
21. Bubbles models and tables	307
22. Decompression Software	313
23. Multi-level diving	319
24. Dive computers	333

SECTION 3: Altitude considerations and diving

25. Flying after diving.	353
26. Diving at altitude.	361

SECTION 4: Technical & occupational diving

27. Introduction.	389
28. Nitrox diving.	395
29. Equipment configuration for extending duration.	407
30. Decompression diving.	413
31. Mixed gas diving.	429
32. Rebreather diving.	427
33. Decompression emergencies.	458
34. Occupational diving.	461

APPENDICES:

1. U.S. Navy Air Diving Tables.	473
2. DCIEM Air Diving Tables.	482
3. Bühlmann High Altitude Tables.	505
